

Capability Statement

Odiscom supports government, carrier, contractor, and infrastructure programs with practical telecom engineering, field-aware coordination, and construction-ready delivery across fiber, wireless, towers, and telecom infrastructure.

Core Competencies

- OSP / fiber route development and field-aware engineering support
- Wireless infrastructure coordination and carrier program support
- Tower upgrade, modification, and vertical infrastructure support
- Construction-ready documentation and execution-focused delivery support
- Permit support, utility coordination, and field verification workflows
- Project coordination aligned with real deployment conditions

Company Snapshot

Legal Name: Odiscom LLC

Website: www.odiscom.com

Email: owners@odiscom.com

Phone: (469) 531-1176

Headquarters: League City, Texas

Ownership: 51% woman-owned

Public-Sector Readiness: Capability statement and onboarding materials available

Registrations: UEI / CAGE / NAICS available upon request or to be added

Differentiators

Built around real deployment conditions, not abstract design

- Practical, execution-minded approach built around real field conditions
- Support across fiber, wireless, tower, and telecom construction environments
- Responsive coordination designed to help projects move with fewer delays
- Documentation and delivery support focused on constructability and clarity
- Flexible support model for agencies, primes, contractors, and infrastructure partners

Government

Support for agency, municipal, and public-sector telecom infrastructure projects requiring practical engineering, coordination, and clear delivery support.

Carrier / Infrastructure

Support across carrier, tower, contractor, and infrastructure partner programs involving fiber, wireless, tower, and telecom construction workflows.

Contract Readiness

Capability statement, onboarding materials, and procurement support can be tailored for public-sector, prime contractor, and structured infrastructure opportunities.
