ODISCOM LLC

Engineering support for broadband deployment

Established 2015 | League City, Texas

Engineering lead: Jacob Goralski, PE

WIRELINE + FIBER CAPABILITIES

OSP routes. Fiber facilities. Buildable plans.

Odiscom supports operators, engineering firms and prime contractors with fiber design, field data, joint-use permitting and the civil engineering behind network facilities. Engage us for defined project scopes or recurring production support.

HOW WE SUPPORT YOUR TEAM

OSP design & drawing production

Aerial and underground route plans; conduit, bore and handhole details; FTTH mainline and drop packages.

Fielding & joint use

Pole data, loading and clearance review; make-ready documentation and utility application packages.

Permitting & agency coordination

ROW and permit drawings; municipal and utility coordination; reviewer comments and resubmittals.

Long-haul fiber facilities

ILA and equipment-hut sites; civil/electrical engineering, foundations, grading, drainage and power coordination.

PE review & quality control

Engineering review, drawing reconciliation and sealed deliverables where required; OTMR documentation.

Construction & closeout support

Construction drawing revisions, RFI responses, field redlines and record-drawing support.

SELECTED FIBER & WIRELINE EXPERIENCE

TDS Telecommunications

Helena, MT / Caldwell, ID

Fiber mainline and drop drawing packages; aerial joint-use applications, pole data and clearance exhibits.

Zayo

Denver-Omaha / Richardson-Plano

ILA site acquisition, due diligence, civil/electrical engineering, construction drawings and permitting coordination.

Horrocks

Remington Ranch

Multi-phase fiber drawing production, including route sheets, construction notes and bills of materials.

Stratis

Point Broadband / Ennis, TX

Underground fiber permit drawings for conduit, directional-bore crossings, handholes and public ROW layouts.

SQUAN

Wyoming / South Dakota / Oklahoma

PE review of aerial and underground fiber plans, make-ready documentation, OTMR letters and review comments.

D4 Communications

California fiber-hut projects

Fiber facility engineering and permitting support, including grading, drainage, erosion control and agency comments.

LET'S SCOPE YOUR NEXT PACKAGE

Bret Bachert | Chief Operating Officer
